About This Content

Hand of Fate 2: Outlands and Outsiders DLC expands the Game of Life and Death with a brand new campaign challenge and a unique companion character.

Risk the ire of chained gods in the Mapmaker Challenge as you search for a legendary portal that can undo a mistake from your past. Then join Hubie the Orphan, your unpredictable new goblin companion, in his struggle to unravel a world-ending prophecy.

This content requires the base game Hand of Fate 2 in order to play. Mapmaker unlocked after completion of High Priestess Challenge. Hubie unlocked from the Burrow Borrow encounter (awarded on completion of Hierophant Challenge).

This DLC includes:

- NEW Challenge: The Mapmaker - There are places where the boundaries between life and death grow thin. None but the foolish or desperate would approach these gateways, but if you would change what has gone before, you must venture to the lands where even the gods have died - the Mournful Wastes.
- NEW Companion: Hubie the Orphan - this mischievous goblin will vex your foes.
- NEW Companion Quest: Grave prophecy haunts Hubie the Orphan. Can he prevent a terrible calamity and restore his place in goblin society?

-
- NEW Encounter and Equipment Cards to unlock

Graphically intense, sound is brilliant, the music Awesome - and then it starts to go flat...

Controls require you to have 3 or 4 hands, Joystick support is really a joke - My Thrustmaster Fox 2 Pro cannot be remapped, but if you have an XBox 360 controller you are laughing. Single play is really nothing more than training that can jerk you around randomly, and online play is pretty rare - out of the 4 times I tried it, 3 times I gave up after 20 mins because I had no enemies, the 1 time I found someone, the lag was intense and the other player was so good, it was a turkey shoot.

4/10 Dragons. From what I see in the game, the developers tried to make something different.

It may be a good idea but it's still lack of something.

There's potential for this to be good.. I just got my Vive new, but i played some different games on friends places or conventions and watched a lot of gameplay videos. so i have to say Viking Rage is really worth the money cus it brings way more features and things to explore with it than most of the other vive games i've tried. the physics are great and the graphics are cartoonish in a very good way. 3D Audio is also implemented so i would use headphones for playing this game, but it works just fine on speakers as well.

i also like that there are minigames within the game, but u have to find them in the mainhall, and i think u have to unlock them first.

overall a very worth trying out for everyone owning a HTC Vive.. I've played every single Senran Kagura game that's been released and I have to say that there's something about this one that makes it significantly more enjoyable than previous entries to the series. Although it's the exact same story from the original game (as to expect from a remake,) the combat system here in my opinion is a perfected version of the combat system from SV and EV. I haven't finished it just yet, but there is clearly much more polished than previes entries, and it makes this game feel refreshing. Cutscenes finally look more involved, looking more like an actual scene than an event from a visual novel. Also, this is the good version of the game with all the intimacy. Thank you PC port.

That said, there are several comments here regarding the issue of game performance, and I too had this issue until I figured out that for some reason the game doesn't use the best graphics processor by default. So you have to go into the settings and make that the case manually. Doing this is simple enough, and hopefully I can help everyone enjoy this game as it's meant to be played.

So in order to go about fixing the performance issue, you'll have to go into the local files. If you already know how to get there, skip to step 3

- 1) From your game list right click on "SENTRAN KAGURA Burst Re:Newal" and click properties.
- 2) Go to the LOCAL FILES tab and click "BROWSE LOCAL FILES."
- 3) Right click on "SKBurstReNewal.exe" and highlight "Run with graphics processor." From there, select "Change default graphics processor..."
- 4) From the NVIDIA Control Panel, go to the second drop down menu and change the preferred graphics processor from "Integrated graphics" to whatever you have that's better than that. (In some cases, you may need to select the game via the "Add"

button.)

5) You should be set! Hope this helps those who are having issues.. Well.... That was terrible, I felt sick after about 30 seconds of totally unimmersive video. The graphics are awful and the models were more copy and paste than my business studies essays from back in school.. Great time killer cheap too. Unfortunately can't recommend.

The frame story tries too hard to be both sentimental and tongue-in-cheek but there isn't enough meat to the gameplay to support the plot. Dragon Quest this is not.. I've paid more for less

Short story: I recommend the game! It is a bug free, solid but light dungeon crawler experience which you will have fun with to the end. Don't expect any control over character progression. There is no choices or skill trees. You are automatically give all at level up. Great graphics and fast loading.

. I mean the game seemed great. I loved Viridi. But when I start it, it doesn't even open. I get a black screen then it stops responding. I meet all the system requirements too.. I bought this game during Summer Sale 2016 and i have to say this is one of the best games for Low Spec PC. The Graphic is very good. The Weapons are crazy and fun to use it. You got many ways to kill a enemy. There are lot of enemys to fight. Missions design are cool. The conversation is funny too and the best things are the secrets :D This is my new favorite game 9/10. This is a great game and I had a blast playing it in 2019.

To address the mixed reviews I think I understand what is going on here. When you hold this title up against its predecessor there are some things missing from this title which I think warrant some peoples complaints namely: there's not much of the game that is destructible which is sorely missed since it was such a huge aspect of the first game, and its shorter than the first game (it was a perfect length imho but to each his own). Those are valid complaints when you compare it with the first game and I guess I just wish they had named it something other than Red Faction because when you look at the game without comparing it to its predecessor its great!

What you get in place of those aspects that are missing is a more exciting action packed game with more interesting NPCs, great voice acting (the great actor Jason Statham voices one of the characters!), excellent vehicle levels to add variety and interesting boss fights. The story had twists and turns which kept it interesting all the way through. This whole game was cinematic.

The gunplay is excellent. All of the weapons feel appropriately powerful and make a big impact which makes the basic shooting in the game (which is the core of the gameplay) feel fantastic. Its a joy to play and I had a blast.

I played it in 4k with max settings and it looked better than I expected it to tbh.. Love this game! You can jump in and out of it quickly as you have time. It logs quests and auto- maps once you have the skill. It rewards reading the NPC text by giving you new quests or not... If you just click through NPC stuff you will miss out. You can game the game. You can optimise every actions or just roleplay it. I played it and then replayed it to exploite my knowledge of the game engine. There are tons of tricks and stratagy. Love it!!!. Bounce....this game is ADDICTING as hell. Honestly I bought it because I wanted to play more Portal and this was the closest thing I could find for puzzles. This game is great and you actually have to use your brain a bit to get the ball from point A to point B. Try it out you won't be let down!. After 1 hour of Watch this play time i have come to write this review. I will conclude the final review when i have finished the game

Civil Savages clearly has great ideas, It won't blow you away, but you should be entertained enough to appreciate the effort. Non-repetitive puzzles instead of the fighting. Simply love the style an exploration focus.

Scary and fun game to play. Different monsters, Hard game, not easy to escape , i died probably 10-15 and have yet to escape I really like this game.

Worth the money? yes. Ram is dah man.. One of the best visual novels I've ever played. Besides interesting characters and just gorgeous art it has this really neat mystic adventure vibe that makes the story all the more appealing and immersive and leaves you begging for more.

Can't wait for the next chapters.
